

500 - WIRE FEED PADS - TREATED

For use on M.I.G. wire feeders to remove dust and dirt from wire prior to wire entry into the liner conduit. Use of Wire Feed Pads can decrease the coefficient of friction in the liner as much as 50%.

Reduces erratic feed and burn back. For use on steel, stainless steel, hard facing silicon bronze, solid and flux core wire. Treated pads may be re-treated with Wire Feed Pad Lubricant (Product No. 502).
