HTR500B HEAT TINT REMOVAL MACHINE WITH BRUSH APPLICATOR

HTR500B Complete Machine with Brush Applicator

The Heat Tint Removal Machine quickly and economically removes heat tint and discoloration from welded heat-affected zones on stainless steel after T.I.G. welding applications. A light application of Dynaflux HTR-120 Solution using the brush applicator eliminates grinding, sanding, buffing and polishing. Cleans and passivates in one easy step. The brush applicator is specifically designed to maneuver into corners or other difficult to reach areas, and uses a replaceable brush.

Machine Features:

• 115 vac power supply
• power indicator light
• protected with circuit breaker relay
• powerful transformer
• cooling fan for heavy duty applications and extended machine life
• dinse connectors
• heavy duty ground clamp
• light-weight and portable
• no surface preparation needed
• cleans and passivates in one easy step
