

COLD GALV

Liquid Zinc Galvanizing Coating

Zinc rich coating produces sacrificial protection to stop rust and corrosion on all metal surfaces.

Any deterioration leads to rust and/or corrosion of the coating rather than the metal surface.

Equivalent to hot dip galvanizing in cathodic protection and film durability and protects against caustic action salt spray. Resists peeling, blistering, rust, weather, gasoline and oil. Compounded from metallic zinc dust. Apply with brush or roller or dilute for spray application.
